ABOUT ME

I am a highly ambitious web developer with eight years of experience and a keen understanding of product development, design and project management.

SKILLS

JavaScript, AngularJS, Angular, HTML, CSS, SASS, Bootstrap 3, jQuery, C#, Microsoft SQL Server, Git, Gulp, Webpack, Cordova, Sketch, Adobe Creative Suite, Atlassian Suite, InVision

EXPERIENCE

JUNIOR.GOLF

Front-End Web Developer, Project Manager, Product Designer
June 2015 - Present

Developed a Cordova iOS/Android kiosk application for golf pro shops that made it easier to sign up for facility programming, track practice and play sessions and view leaderboards. It utilized a simple full page slide/swipe architecture.

Produced multiple AngularJS & Angular web portals with a wide variety of features and tools for instructors, families/players and administrators. Some of those features include the ability to create programming, review player statistics, register for activities, send campaigns and explore a diverse training video library. Various third-party libraries including Bootstrap 3, Chart.js, Summernote and FullCalendar were also leveraged.

Designed a multitude of original and sophisticated images, wireframes, design specs, Marvel/InVision prototypes, style guides and responsive email templates for multiple iOS applications and web portals.

Managed multiple development agencies and internal team members using Agile methodologies and SDLC principles to effectively plan, build and deploy multiple iOS applications, web portals, landing pages, internal admin tools and communication/marketing strategies.

CLARITY VENTURES

Back-End Web Developer
June 2014 - March 2015

Responsible for launching and maintaining multiple DNN websites that utilized AngularJS, ASP.NET, MSSQL 2008 and Microsoft Dynamics CRM to meet the needs of each respective client.

OROSOLUTIONS

Development Team Manager, Web Developer, Database Administrator
June 2009 - June 2014

Introduced MVC, Agile methodologies and source control to boost team performance/efficiency and guided the company in transitioning from an antiquated VBScript environment to ASP.NET.

Improved the company's financial report delivery system by implementing refined user controls for report generation, shifting to a responsive design, utilizing SSIS packages and producing polished web based financial reports for clients using a variety of APIs from ActivePDF.

EDUCATION

THE UNIVERSITY OF TEXAS AT AUSTIN

Management Information Systems, Bachelor of Business Administration
